

The Number Resource Registry proposal

According to RIR Blueprint (October 2002)

Number Resource Registry (NRR)

Allocated Number Registry

Allocated number space:
Block, date, RIR, correspondence

Reserved number space:
Block, reservation description
(reserved blocks are policy matters)

Unallocated number space

Inverse Number Delegations Registry

Allocated number space that is reverse mapped in the DNS:
Delegation point, RIR, name servers

The Number Resource Registry proposal

According to RIR Blueprint (October 2002)

Outside ICANN framework

Each RIR nominates 3 individuals to the NRR Advisory Board

NRR operated in turn by RIRs according to NRR policies

NRR takes over IANA function for address space

Within ICANN framework

Each RIR nominates 3 individuals to the ASO Address Council

ASO formally adopts global RIR policies

ASO recognizes additional RIRs

ICANN Board can review policies as part of ASO appeals process

The Number Resource Registry proposal

According to RIR Blueprint (October 2002)

Number allocation process

NRR policy adoption
